## SANITATION CERTIFICATE

This is to certify that the shipment of the product(s) described on the Certificate of Origin and Free Sale are products of the State of New Mexico. We certify that the facilities, equipment and raw material and the processing and packaging procedures meet all sanitary requirements of the State of New Mexico. We further certify that their products are freely and without qualification sold and used in the food industry and are fit for human consumption in the State of New Mexico and the United States of America. The NM Company processing milk products is registered and in good standing with the Business Services Division of the Office of the New Mexico Secretary of State.

Name and address  
of manufacturer:

Milk Plant No.:

Products produced at the plant listed above are for human consumption and the ingredients used are approved by the United States Food and Drug Administration.

The New Mexico Department of Agriculture conducts regular inspections of the above facility. The inspections are comprehensive health inspections including sanitation, pasteurization equipment testing, ingredient and labeling reviews, and product sampling and laboratory analysis.

This is to certify that Rinderpest, Foot and Mouth Disease and Contagious Bovine Pleuropneumonia do not exist in the State of New Mexico.

To help prevent the establishment and amplification of Bovine Spongiform Encephalopathy (BSE) through feed in the United States, the Food and Drug Administration (FDA) has implemented rules prohibiting the use of most mammalian protein in feeds for ruminant animals. These rules are Title 21 Part 589.2000 and Title 21 Part 589.2001 of the Code of Federal Regulations.

If there are any questions regarding the standards and inspection program of the New Mexico Department of Agriculture and the New Mexico Scientific Laboratory Division, please call Mr. Alfred Reeb at 505-841-9425.
